### **Climate Risk to Energy Projects, Part II**

Now available, the second installment of a three part series shows how climate (and it's derivative: weather) affect the risk profiles of different energy projects. Part one illustrated the many examples of such climate risks. This installment tabulates all of these risks for different energy project types and shows how the risk profile changes with climate for each risk type (linear, non-linear, discontinuous, etc). ### **You, Me, and the Sea: Our Life with Coral Reefs**

This article was originally posted on the Worldwatch Institute blogs. Picture, if you will, a clear blue sea. You're going snorkeling along a coral reef. This is biodiversity on over-drive: Every square centimeter is covered with hundreds of little creatures. You see millions upon millions of tentacle-rimmed mouths—each feeding a tiny individual coral polyp—guarded savagely by resident crabs, fish, and shrimp. Right next door, a myriad of other coral species, with added choice residents and predators, sway in the waves. Algae—the sugar-producing pals of corals—
